

HOW TO IMPLEMENT SOCIAL LOGIN IN YOUR PROJECT (GOOGLE&FACEBOOK)

❖ LOGIN THROUGH GOOGLE

STEP:1 -> CREATE APPID AND SECRET KEY .

- Go to console.developers.google.com
- Now create a new app.
- Give name to it and click create .
- Now go to your project you have created and select google+api and enable it.
- Now create credential select OAuth client id .
- Select application type
- Add authorized javascripts origin(e.g=<http://sample.co>).and create.

-> you will get the appid and secret key.

STEP:2 -> NOW IN UR PROJECT IN JS FILE IN YOUR GOOGLE METHOD (for e.g google())
GIVE CLIENT ID i.e IS AppID.

STEP:3 -> INCLUDE THESE FILES IN YOUR HTML OR VIEW PAGE

```
<script src="https://apis.google.com/js/platform.js" async defer></script>
<meta name="google-signin-client_id"
content="469707559402-52lvoielarr6rgr810svlsna3gke5veu.apps.googleusercontent.com">
```

❖ LOGIN THROUGH FACEBOOK
