

CHARTS(pie,line,bar)

PIE CHART :

1. Include js file for bar chart and .js file you created in html

```
-> <script  
src="https://cdn.anychart.com/releases/v8/js/anychart-core.min.js"></scrip  
t>  
<script  
src="https://cdn.anychart.com/releases/v8/js/anychart-cartesian.min.js"></  
script>  
<script src="/home/tacto/Downloads/bar.js"></script>
```

2.Now on your html page use element to display chart you can use span,div

E.g

```
-> <div id="container1" style="width: 50%; height: 30%"></div>
```

3. In your .Js file write the following code:

```
anychart.onDocumentReady(function() {  
    var data = [  
        ["English", 80],  
        ["Hindi", 87],  
        ["Marathi", 73],  
        ["Physics", 54],  
        ["Chemistry", 90],  
        ["Mathematics", 55],  
        ["Biology", 66]
```

```
];  
    // create a chart  
    chart = anychart.column();  
    // create a bar series and set the data  
    var series = chart.column(data);  
  
    // set the titles of the axes  
    chart.xAxis().title("Subject");  
    chart.yAxis().title("Marks");  
    // set the container id  
    chart.container("container1");  
    // initiate drawing the chart  
    chart.draw();  
});
```
