CHARTS(pie,line,bar)

PIE CHART :

1. Include js file for Pie chart and .js file you created in html

->

```html
        <script src="https://cdn.anychart.com/js/8.0.1/anychart-core.min.js"></script>
        <script src="https://cdn.anychart.com/js/8.0.1/anychart-pie.min.js"></script>
 <script src="/home/tacto/Downloads/chart.js"></script>
```

2.Now on your html page use element to display chart you can use span,div

E.g

->
```html
<div id="container" style="width: 50%; height: 30%"></div>
```

3. In your .Js file write the following code:

```js
anychart.onDocumentReady(function() {

    // set the data
    var data = [
        {x: "English", value:54},
        {x: "Hindi", value: 78},
        {x: "Marathi", value: 73},
        {x: "Physics", value: 86},
        {x: "Chemistry", value: 66},
        {x: "Biology", value: 80},
        {x: "Sport", value: 90}
    ];
```

```javascript
  // create the chart
  var chart = anychart.pie();

  // add the data
  chart.data(data);

  // display the chart in the container
  chart.container('container');
  chart.draw();
});
```
